

Quality Gates™

Custom Development & Licensing Agreement — March 28, 2026

PREPARED BY

Voxtern AI Solutions Inc.

PREPARED FOR

Escape Trailer Industries Ltd.

PARTNER STATUS

★ Early Adopter Partner

01 Executive Summary

Voxtern AI Solutions Inc. ("Voxtern") is pleased to present this proposal for the development and deployment of **Quality Gates™** — a digital quality inspection and control system — tailored specifically for Escape Trailer Industries Ltd. ("Escape Trailer").

Quality Gates™ replaces the existing paper-based quality inspection system currently in use at Escape Trailer with a modern, mobile-friendly digital platform. It enables real-time defect tracking, inspection workflows, rework management, and data-driven quality analytics.

As an **Early Adopter Partner**, Escape Trailer receives preferential pricing and direct influence on product development priorities.

What is Quality Gates™?

Quality Gates™ is a quality inspection and control platform designed for manufacturing environments. It enables organizations to:

- Digitize inspection checkpoints

across production stations with standardized criteria
- Capture defects in real-time

with photo/video documentation and categorization
- Track rework

from identification through resolution with full accountability
- Manage punch lists

for systematic issue tracking and closure
- Analyze quality trends

with dashboards, Pareto charts, and station-level metrics
- Ensure compliance

with documented inspection records and audit trails

Key Features

FEATURE	DESCRIPTION
Inspection Workflows	Station-based quality gates with configurable checklists
Defect Capture	Log defects with category, severity, location, and media attachments
Media Documentation	Photo and video capture directly from mobile device camera
Punch List Management	Track open issues through assignment, action, and closure
Rework Tracking	Monitor rework items from identification to sign-off
Dashboard & Analytics	Real-time quality metrics, defect trends, Pareto analysis
Role-Based Access Control	Admin, Inspector, and Supervisor roles with appropriate permissions
Mobile-First Design	Optimized for tablet and phone use on the production floor
Reporting & Export	Generate quality reports in PDF and Excel formats

FEATURE	DESCRIPTION
Audit Trail	Complete history of all inspections, edits, and sign-offs

Current System vs. Quality Gates™

CAPABILITY	CURRENT (PAPER)	QUALITY GATES™
Inspection records	✗ Paper forms, filed manually	✓ Digital, searchable, instant
Defect photos	✗ Separate camera, manual filing	✓ In-app capture, auto-linked
Rework tracking	✗ Verbal/whiteboard	✓ Systematic with accountability
Trend analysis	✗ Manual counting	✓ Automated dashboards
Multi-user access	✗ One clipboard per station	✓ 15+ concurrent inspectors
Data retrieval	✗ Dig through paper files	✓ Search by unit, date, defect type
Compliance & audit	✗ Paper trail, risk of loss	✓ Digital audit trail, backed up

Phase 1 — Core Development (Weeks 1–2)

DELIVERABLE	DESCRIPTION
Backend API	Node.js/Express server with database
User authentication	Secure login with role-based access (Admin, Inspector, Supervisor)
Inspection workflow engine	Configurable quality gates per production station
Defect logging	Defect entry with category, severity, location, and notes
Media capture	Photo upload and camera integration for defect documentation
Punch list	Issue tracking with assignment and status management

Phase 2 — Enhancement (Weeks 2–3)

DELIVERABLE	DESCRIPTION
Rework tracking	Full rework lifecycle — identify, assign, action, verify, close
Dashboard & analytics	Real-time quality metrics, defect Pareto, station performance
Reporting module	PDF and Excel report generation
Admin panel	User management, station configuration, checklist builder
Data export	Full data export in standard formats
Audit trail	Complete change and inspection history

Phase 3 — Deployment & Handover (Weeks 3–4)

DELIVERABLE	DESCRIPTION
Production deployment	Hosted on dedicated server, SSL secured
Station setup	Configuration of all quality gates and inspection checklists
User setup	Creation of all inspector and supervisor accounts
Training session	1-hour virtual training for administrators and inspectors
Documentation	User guide, inspector quick-reference card, admin documentation

★ As a valued **Early Adopter Partner**, Escape Trailer receives significant preferential pricing compared to standard market rates.

ONE-TIME

DEVELOPMENT FEE

\$6,990 CAD

Standard market rate: \$18,000 CAD

61% Early Adopter discount

MONTHLY

LICENSE FEE

\$150 CAD/mo

Up to 15 users included

+ \$12 CAD/user/month additional

Monthly License Includes

- ✓ Application hosting and maintenance
- ✓ Daily data backups
- ✓ Software updates and improvements
- ✓ Technical support (email, business hours)
- ✓ Up to 15 named users

Payment Terms

MILESTONE	AMOUNT	WHEN
Project kickoff	\$3,495 CAD (50%)	Upon agreement signing
Delivery & acceptance	\$3,495 CAD (50%)	Upon production deployment
Monthly license	\$150 CAD/month	Starting from deployment date

All amounts in Canadian Dollars (CAD), plus applicable taxes. Invoices payable within 30 days of issue. Monthly license billed on the 1st of each month.

Timeline

- WEEK 1

Project kickoff, backend development, inspection workflow engine
- WEEK 2

Frontend development, defect capture, media integration, punch list
- WEEK 3

Rework tracking, dashboards, reporting, admin panel, testing
- WEEK 4

Production deployment, station setup, training, handover

Estimated completion: 3–4 weeks from agreement signing.

7.1 Intellectual Property

All software and source code remain the exclusive property of Voxtern AI Solutions Inc. Escape Trailer is granted a non-exclusive, non-transferable license for the duration of the active license agreement.

7.2 Data Ownership & Privacy

All data entered by Escape Trailer remains their exclusive property. Voxtern will not access, share, or sell this data. Upon termination, a complete export is provided and data deleted within 30 days upon written request.

7.3 Confidentiality

Both parties agree to maintain confidentiality of all proprietary information, including business data, employee information, quality records, pricing terms, and technical specifications.

7.4 License Term & Termination

Minimum term of 12 months from deployment. After the minimum term, either party may terminate with 60 days written notice.

7.5 Service Level

99% monthly uptime target. Support response within 24 business hours (non-critical) or 4 business hours (critical). Scheduled maintenance communicated 48+ hours in advance.

7.6 Warranty

Software warranted to perform per agreed specifications for 90 days following deployment. Defects reported within warranty period resolved at no additional cost.

7.7 Limitation of Liability

Total liability shall not exceed fees paid in the 12 months preceding any claim. Voxtern shall not be liable for indirect, incidental, or consequential damages.

7.8 Modifications & Change Requests

Feature additions beyond agreed scope will be quoted separately. Minor adjustments and bug fixes are included in the monthly license.

This proposal is valid until **April 30, 2026**. To proceed, please sign below and return a copy to Voxtern AI Solutions Inc.
